ILLUMINATING THE POSSIBILITIES OF  
CANNABIS-BASED WELLNESS

# WE BELIEVE IN THE POWER OF CANNABIS.

We're passionate about cannabis and botanical medicine because we know they can improve happiness and health.

Lighthouse Sciences products are manufactured under stringent safety and quality controls with formulations backed by Medical Doctor-led research and implemented by our in-house Certified Aromatherapist.

**Join our community.**

**This is cannabis patient care, evolved.**

# LIGHTHOUSE PREMIUM CONCENTRATES

To maximize flavor and potency (as allowed under Ohio Law), Lighthouse Sciences cuts no corners manufacturing our premium crafted cannabis concentrates. We chill cannabis to -120° and extract below -100°, to eliminate extraction of plant waxes and lipids. Additionally, we use triple distilled, lab-grade LPG as our extraction medium and filter extract to .2um (micron), ensuring cannabinoids and terpene purity. As a result, our products are clean, smooth, and flavorful, with exceptional color and unparalleled effects. Your patients will taste and feel the purity of cannabinoids and terpenes and nothing else.

**LIGHTHOUSE  
SCIENCES**

# MJ MUSCLE AND JOINT BALM

Lighthouse Sciences Muscle & Joint Balm features THC and CBD, olive-oil infused Arnica, Calendula, and St. John's Wort, for a creamy and smooth application that provides powerful fast muscle relief without greasiness. And with the addition of Wintergreen, Peppermint, and Copaiba, our balm is deeply satisfying when applied to sore and swollen muscles and joints. Give your patients the physical (and mental) relief they need to be their best every day.

# PRECISION METERED SUBLINGUAL SPRAY

Lighthouse Sciences is proud to offer the next generation of timed tincture delivery systems formulated with MCT oil to increase bioavailability in two strengths. Instead of using a dropper bottle, we use an ultraprecision-metered spray bottle so your patients can easily find (and repeat!) their ideal dosage and feel the effects within 15-minutes. In addition, we precisely meter each spray to deliver 1/10th of a milliliter of product to help patients quickly modulate and control the product's effects. Low spray volume allows your patients to dial into their optimal dosage, comfortably.

# LIGHTHOUSE SCIENCES VAPES

Lighthouse Sciences' unique all-in-one ceramic atomizer is a next-generation cannabis vape. With no charging or buttons to pre-heat or lock and unlock the device and a half gram of the highest-grade live resin oil available today, our signature vape is simple, intuitive, and effective. All your patients have to do is put the device to their lips and inhale when they're ready; it's that simple. And when they're done, the device is disposable and recyclable. It's also tamper-proof for child safety. An oversized battery ensures patients are never left with unused oil in a vape without charge. All of this in a small and convenient form factor that fits as comfortably in the palm of your hand as it does in your pocket or bag.

# BUNJI VAPES

Lighthouse Sciences is proud to offer the East Coast's premier vape brand, Bunji Vapes. Bunji's master cultivators capture the essence of the rarest cannabis flower in every cartridge (cultivated by the masters at AltSol). Their Cart of Gold offerings include full-spectrum THC and CBD distillates and terpenes, and powerful CBC and CBG isolate formulated from the world's rarest flower. In addition, Bunji's live strains represent the most exemplary profiles available today. We're proud to bring these exceptional products to Ohio's medical cannabis market.
